

If you don't have a corporate real estate strategy, it doesn't matter who your broker is.

That's a bold statement to make, we realize!

It highlights a critical difference between our Corporate Representation model vs a traditional commercial real estate brokerage. Strategy should guide all decision-making in commercial real estate. Traditional brokerages tend to focus on the immediate transaction, prioritizing deal-making. In contrast, we take a holistic approach, aligning real estate decisions with your company's overarching business goals and growth strategy.

Let us tell you a quick story...

We once worked with a fast-growing tech company. They were energetic, innovative, and poised for expansion. But despite their momentum, they didn't have a comprehensive real estate strategy. Their office spaces were a hodgepodge of leases scattered across town, each managed by different brokers. As the company grew, these leases started to squeeze their efficiency and budget, leading to rising costs, disjointed teams, and a struggle to find suitable new spaces.

We stepped in and asked them to take a step back. What were their goals, not just for now, but for the next five to ten years? How were their locations and properties impacting their productivity and culture? And were they confident that their existing leases supported their financial health?

Together, we crafted a cohesive real estate strategy that aligned with their business vision. We consolidated leases, negotiated favorable terms, and created a roadmap that allowed them to expand into new, vibrant neighborhoods without compromising their budget. Their real estate now works for them rather than against them.

Here's why our Corporate Representation model matters for
